

POLITICAL RESOLUTION

No. 8(3) VI 2023

The Secretariat of the Central Revolutionary Committee
of Internationalist Revolutionary Communist Party
in the process of formation
issued the 'Political Resolution'
Regarding to creation of *'World Anti - Imperialist Platform'*

The Internationalist Revolutionary Communist Party deeply condemns the revisionist departure from the principles of Marxism - Leninism - Maoism, by the so - called: *'World Anti - imperialist Platform'* and its constituent organizations.

In the Internationalist Revolutionary Communist Party opinion, the *'World Anti - imperialist Platform'* is an opportunistic formation which every truly communist, guided by the correct understanding of Marxism - Leninism - Maoism, must be deeply condemned and rejected as an action harmful to the revolutionary international communist movement.

Particularly noteworthy is the fact that WAP was initiated by the PDP, a party with dubious origins and controversial international activities, such as running businesses for money by producing all kinds of merchandise and renting hotels for meetings. Also, the ideological foundations of this organization have nothing to do with Marxism - Leninism, much less Maoism and the fight against imperialism. The WAP members themselves (Venezuela's ruling party, Angelo' D' Angelo, the fascist Center for Political Innovation CPI led by Caleb Maupin), have nothing to do with the revolutionary communist movement. The initiative of creating an anti - democratic front in the territory of an artificially created state and being an imperialist military base is about the peculiar absurdity and lack of a correct interpretation of the phenomenon of imperialism, combined with political stupidity.

Creating an anti - imperialist front without cooperation with the world and historical leader of the fight against imperialism, which is the Democratic People's Republic of Korea, and in the southern part of Korea without establishing contact and cooperation with the leader of anti - imperialist activity - *'Anti Imperialist National Democratic Front'* is an expression of the big lack of knowledge of the reality in this world area in the sense of the anti - imperialist struggle and also picture of lack to the right worldview as political awareness limitation as well and also short - sighted stupidity of its creators with the British pseudo - Marxist organization, as there are pretending to be communists under the name of CPGBML. These organization alike CPGBML, is an expression of the modern revisionism in the UK. In the past and present, the CPGBML has broken and continues to break the principles of Marxism - Leninism and distorts it and presents it in untruth and revisionist interpretation. Thus, the creation of such a platform in the southern part of Korea on the territory of a US puppet state, created artificially, which is a US military base without its own independence and with the status of a vassal and servant dependent on the US, with organizations that are not in the camp of the world revolutionary communist movement, characterized as those that, according to with Marxist dialectic law recognize Maoism as the third stage of development of this same Marxism and reject revisionism and opportunism based on *'parliamentary cretinism'* and naive faith in the victory of socialism through the use of only legal means, reformism and collaboration with the capitalist ruling forces - is to destroy the revolutionary spirit of Marxism - Leninism and also attack on the world revolutionary movement.

Imperialism is not just a system that characterizes the US - EU - NATO axis of consolidated power and is not just aggressive US military activity as the WAP and its members try to define it. In the understanding of the WAP and the revisionist organizations that belong to it, imperialism is the aggressive foreign policy of the US and is characterized by its uniqueness in this US - EU - NATO alliance of forces. Such an understanding of world imperialism and its limitation to an aggressive foreign policy and military pressure is an erroneous and distorted understanding of the realities of the present world, and a definition of the global balance of power that is also inconsistent with the principles of Marxism - Leninism - Maoism. According to the principles of Marxism - Leninism - Maoism, i.e. correct analysis based on Marxist analysis, imperialism has an economic basis. Therefore, defining Russia and China as allies in the fight against US imperialism is nonsense - because China and Russia themselves are imperialist countries. Marxist analysis makes it clear and distinct that where the means of production are in the hands of private owners as in Russia, or to a lesser extent (but still) as in China, it does not alter the fact that capitalist exploitation of man still occurs. Russia and China in the development of backward countries in the world are only an attempt to create the illusion of socialism other than Marxist roots, and thus the distortion of Marxism - revisionism. There is no other interpretation, because it simply cannot be. There where is capital, is also profits and worker's exploitation. There is no third way.

The revisionist assumptions of the WAP with the hope of building a world anti - imperialist camp with China and Russia do not fit into any canons

and principles of Marxism – Leninism. The WAP – created worldview they are trying to present as anti – imperialist has nothing to do with true and right anti – imperialism as experiences and examples with great epochal achievements of the DPRK or long anti – imperialist struggle of the AINDF. This point of view adopted by the WAP is unrealistic and inconsistent with reality and therefore has nothing to do with Marxist dialectics, because it supports the exploitation of the international working class by maintaining the illusion that China is a socialist and non – imperial country and Russia is also not involved in imperialist practices which is a big lie spread by leftists. The reality, however, is different. Both China and Russia are imperialist countries, and their economic examples of exporting capital and the imperialist practices of exploiting workers in other countries for capitalist gain confirm this imperialist status of these countries. Therefore, building an anti – imperialist alliance, whether by the WAP or other organizations based on two world imperial powers, which are both Russia and China, is a kind of farce and comedy. It will lead to nothing but to reinforce the contradictions in the world imperialist system by supporting one imperialism with the world power of bourgeois multinational corporations (China and Russia) against another (USA), harming the real world revolutionary movements, and fooling the world's low – class – conscious of the working class, who do not can properly read and understand the interpretation of Marxism – Leninism in relation to defining the concept of imperialism that is not limited to the US. Imperialism has mainly economic foundations and must be defined through a class, Marxist approach. The interpretation undertaken by the WAP and its revisionist organizations is revisionism that has nothing to do with the correct interpretation of Lenin's imperialism.

At present, in the world stage of the international communist movement, and especially in the British political scene, there are attempts at false activity under the cover and appeal to Marxism – Leninism and even in the name of these organizations as 'Marxist and Leninist'. IRCP, in accordance with the correct based on classes analysis of these movements, says that it is not the name but the practical activity and underlying ideological principles that are the touchstone and measure of Marxism and Leninism. The activity of these parties, as the practice shows with joining the WAP, contradicts the principles of Marxism – Leninism and is the same revisionist activity that the Chinese Communist Party is currently conducting, which can be briefly described as: '*socialism in words – capitalism in practice*'.

The revisionist practices of such pseudo – Marxist organizations which define themselves as '*communist*' like the CPGBML in the UK or on the world stage like the WAP with its members, are reactionary and harmful and completely ridiculous and inconsistent with the glorious idea of anti – imperialism and are an attack on the revolutionary ideological foundations of Marxism – Leninism – Maoism. This can be characterized in the words of Lenin:

*'Wherever Marxism is popular among the workers, this political trend,
this 'bourgeois labour party',
will swear by the name of Marx.*

*It cannot be prohibited from doing this,
just as a trading firm cannot be prohibited from using any particular label,
sign or advertisement.*

*It has always been the case in history that after the death of revolutionary leaders
who were popular among the oppressed classes,
their enemies have attempted to appropriate their names so as to deceive the oppressed classes'*

(Vladimir Lenin, '*Imperialism and the Split in Socialism*')

The IRCP will stigmatize, expose and condemn revisionism within the UK political scene as well as internationally, in accordance to the practice the '*Anti – Revisionist and 'Anti – Imperialist Approach*', from particular principles of the '*Ten Principles of the IRCP Vanguard Communist Party*' and based on *Internationalist Universalism*, being ideological foundations of the Internationalist Revolutionary Communist Party.

DOWN WITH FAKE WORLD ANTI – IMPERIALIST PLATFORM !

DEFEND THE PURITY OF MARXISM – LENINISM – MAOISM !

DOWN WITH WORLD MODERN REVISIONISM!
